

Gather round. I'd like to share with you what I have found. The Wiki Forum has a list of the size of all buildings in Elvenar. Knowing the measurements ahead of time helps you to design your city more efficiently. Scroll down on the login screen to the Community tab or use the Forum & Wiki shortcut when you login to Elvenar to find detailed information that will make your journey more exciting & fun. The shortcut is in the bottom right corner (near the gear icon) that will magically transport you there. Click on it if you dare. Level 2 -- 4x5				East-West Canal 2x6				North-South Canal 6x2			

Producing in the Halfling Farm requires a wide variety of input resources: to produce Fertilizer you will need Mana, to produce Tingle Bread you will need Magic Dust, Grain and Carrots, to produce Savvy Soup you will need Elixir, Carrots and Pumpkins, and to produce Jolly Jelly you will need Gems, Pumpkins and Apples.

In the Farms, Magic Fertilizer is produced for the Fields they cultivate. The Grain Field, which needs a direct connection to a Farm (but no street connection and no irrigation canal connection), can only produce one resource at a time. By upgrading a Grain Field, the produced resource will change.

**You don't upgrade Grain Fields to improve the output, but to switch to a different resource!**

Depending on the level, the Grain Field produces either Grain, Carrots, Pumpkins or Apples that can then be processed in the Farms to make Tingle Bread, Savvy Soup and Jolly Jelly.

To boost your Grain Field production, upgrade the Spring Grove in order to allow you to produce more in the same amount of time. You will know that there is a bonus given from a boost if you see a green arrow on the Goods icon.

The trader can be upgraded once you research the Halflings. <https://en.wiki.elvenar.com/index.php?title=Trader>
